

ENERGY POLICY

Güzel Enerji Akaryakıt A.Ş. aims to use energy efficiently in its facilities and activities to protect natural resources, and to reduce emissions and climate change impacts.

In line with this objective, we hereby undertake;

- To provide a framework for establishing and reviewing energy goals and targets, providing, reviewing and updating information and access to information, resources and support necessary for their fulfillment,
- To continuously improve, document, announce to all employees, review and update our Energy Management System and energy performance in accordance with the purpose and scale of our organization,
- To observe all laws, regulations and other requirements related to energy, and thereby to fulfill their requirements,
- To utilize appropriate sources and technologies to keep energy under control,
- To reduce energy consumption, to make improvements for continuous development related to energy efficiency, to implement them, and to monitor the results attained therefrom,
- To use energy efficient products, to procure energy efficient services, and to prioritize energy efficiency in design activities to improve energy performance,
- To contribute to raising awareness of our suppliers, subcontractors and visitors, as well as to the training of all our employees on energy sensitivity.
